Feeling nervous?

It's okay to be a little nervous

Lots of people feel uneasy about the dentist. You're not alone, and you'll never be judged here. This is how we make it easier.

We explain first
Before anything happens, we tell you what we see, what we suggest and what it will cost.

You're in control
Need a break? Just raise your hand and we'll stop. No pressure, ever.

No judgement, ever
Six months or six years since your last visit, we're simply glad you came.

Bring someone along
A parent, a friend or your partner is always welcome to sit with you.

Been Putting It Off?

We get it, life gets busy. But most of these small things are quicker, simpler and cheaper to fix when you catch them early.

That twinge with ice cream
Sensitivity to cold or sweet things is often an early sign of decay or worn enamel.

Pink when you brush
Bleeding gums usually mean early gum disease, which is very treatable at this stage.

Hiding a chipped tooth
A chip is usually a quick fix, and treating it early protects the rest of the tooth.

Teeth that overlap
Crowded teeth are harder to clean. Aligners or braces can help at almost any age.

It's been a while
No lecture, we promise. A dental check-up and cleaning is the easiest way to start again.
